

ANALYSIS OF THE PRESENT SITUATION OF STROKE REHABILITATION IN SPAIN

Ips: Marta Palacin Larroy, Javier Marta Moreno. Hospital Miguel Servet Zaragoza. Spain

martapalacinlarroy@gmail.com

OBJECTIVES

- Understand the reality of stroke rehabilitation in Spain
 - Know differences between regions
 - Know differences between hospitals in relation with the number of strokes that are treated
 - Know the level of implementation of Spanish Rehabilitation Society recommendations
 - Know the differences in opinion between rehabilitation physician and neurologist

RESULT ANALYSIS

The aim is to get at least 50% of responses in each block of hospitals.

METHODS

- Descriptive study.
- Participants: Hospitals attending more than 100 ischemic strokes per year.
- 162 hospitals:
 - 100-200 strokes: 59
 - 201-350 strokes: 63
 - 351-500 strokes: 24
 - More than 500 strokes: 16
- Online surveys (one for neurologist and one for rehabilitation physician)
- The survey includes all the best practice recommendations of the Spanish Rehabilitation Society.
